

Keep in Mind!

Anytime you plan on stripping your floor

It will require:

**425 hours @ \$10.00 per hour = \$4,260.00 in labor to strip, seal & finish
100,000 sq. ft. of VCT.**

It takes an average of 286 gallons of stripper diluted 3 to 1, 856 gallons of water, 167 gallons of sealer (2 coats) and 150 gallons of finish (3 coats). You will also need stripping pads, mops to apply the sealer and mops to apply the finish, floor pads + the boxes, 263 gallon containers and caps that all need to be disposed of.

If your facility is always open you will need to block areas of the floor until the finish is dry.

By 'Keeping-Up' your floors with the Complete Zing Floor Care System you can eliminate the above!
