

Three Kinds of Dirt

There are **Three kinds of Dirt** you can encounter when you are cleaning a building. “**Loose Dirt**”, “**Stuck Dirt**” & “**Ground-in Dirt**”. The more you can control “**Loose Dirt**” and “**Stuck Dirt**”, you will reduce or eliminate “**Ground-in Dirt**”.

“**Loose Dirt**” is the number one enemy that will enter your facility and work its way through the facility not only effecting the floors condition also the in-door air quality.

Control incoming “Loose Dirt” with proper entrance matting and a good dust mopping or vacuuming program.

*Apply **Zing Dust Control** to dust mops and entrance mats daily. **Dust Control** flocculates loose dust and dirt so you spend less time cleaning your floor.*

Zing
Dust Control

“**Stuck Dirt**” is Loose Dirt that is not removed by dust mopping or vacuuming so it becomes stuck to the surface of the floor..

*You remove “Stuck Dirt” by mopping or auto-scrubbing With **ZING KLEEN-UP**.*

Zing
KLEEN-UP

“**Ground-In Dirt**” is “Stuck Dirt” that is not removed by mopping or auto-scrubbing so it becomes “Ground-In Dirt” that is removed by stripping the floor.

*You can remove most “Ground-In Dirt” by using **ZING FLOOR PREP**. **FLOOR PREP** removes dirt that has penetrated into the floor or floor finish eliminating the need for stripping.*
