

# Floor Prep

Designed to remove ground-in dirt without removing the finish.

*Watch the Youtube video - How to Restore a Floor Without Stripping*

## Frequently Asked Questions

Q. Why would I purchase Floor Prep?

A. The unique properties of Floor Prep creates a chemical reaction that removes ground-in dirt from the finish without removing the finish.

Q. How do I know if Floor Prep will work for me.

A. Dilute Floor Prep 8 oz. into a gallon of cold water. Pick an area out of site that you can pour the diluted Prep on the floor you want to restore. Allow it to set 2-3 minutes. Take the center of a standard strip pad, medium grade hair pad or equivalent and rub the area to see how much dirt is removed. If it works to your satisfaction then you are ready to go. The only reason it may not work is if the dirt is buried under 5 or more coats of finish.

Q. What type of floor can I use Floor Prep on?

A. Floor Prep can be used on any floor that can be cleaned with water. Cold water is recommended. Hot or warm water can soften the finish on the floor.

Q. Can I use Floor Prep in an automatic scrubber?

A. Remember the objective is to remove ground-in dirt that is deep into the finish. The amount of pressure generated with a scrubber may not be enough to pull the dirt out. Use the double scrub method to clean the floor. If floor still not coming clean you may need the low speed side to side floor machine. We have been working with great results the **Blue Blend Burnish Pad by Americo**. If you plan on restoring your floor then use the **Blue Blend Burnish** pad or a **Standard Black Strip Pad on the scrubber**.

*If you have a low speed side to side floor machine then you can use the scrubber to apply the product and pick up the dirty solution after you restore with the low speed side to side machine. Use the **Blue Blend Burnish** pad or a **Standard Black Strip Pad** on the low speed machine for best results. Remember you are not removing the floor finish when you use Floor Prep.*

Zing International, Inc. • 6501 Congress Ave. #100 • Boca Raton, FL 33487

No. 987

Q. What is the best floor pad to use with Floor Prep?

A. Since we are removing ground-in dirt from floor finish without removing the finish we want to use a standard black strip pad or hair pad. The pad we are currently working with for all of our cleaning is the **Blue Blend Burnish Pad by Americo**.

Q. Are there any other uses for Floor Prep?

A. Floor Prep is also know for cleaning grouting, stainless steel and brass.
